

## QUAD OPERATIONAL AMPLIFIERS

### DESCRIPTION

The UTC324 consists of four independent, high gain internally frequency compensated operational amplifiers which were designed specifically to operate from a single power supply over a wide voltage range.

Operation from split power supplies is also possible so long as the difference between the two supplies 3 Volts to 32 volts.

Application areas include transducer amplifier, DC gain blocks and all the conventional OP amp circuits which now can be easily implemented in single power supply system.

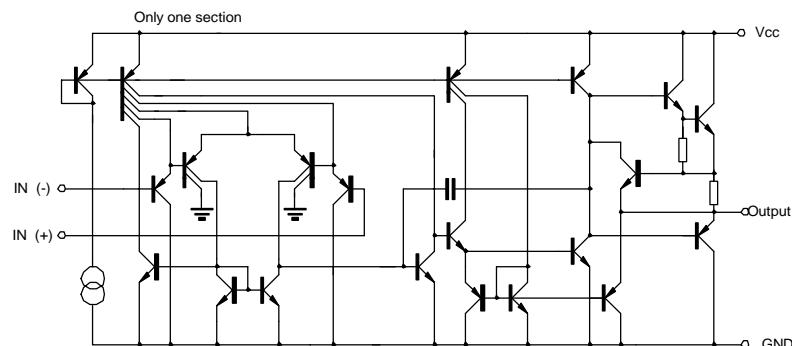

### FEATURES

- \*Internally frequency compensated for unity gain
- \*Large DC voltage gain :100dB
- \*Wide operating supply range(Vcc=3V~32V)
- \*Input common-mode voltage includes ground
- \*Large output voltage swing: From 0V to Vcc-1.5V
- \*Power drain suitable for battery operation

### ORDERING INFORMATION

| Device  | Package         |
|---------|-----------------|
| UTC324D | DIP-14-300-2.54 |
| UTC324E | SOP-14-225-1.27 |

### BLOCK DIAGRAM

### ABSOLUTE MAXIMUM RATINGS(Ta=25°C)

| Characteristic             | Symbol   | Value      | Unit |
|----------------------------|----------|------------|------|
| Supply Voltage             | Vcc      | ± 18 or 36 | V    |
| Differential input voltage | Vi(diff) | 32         | V    |
| Input Voltage              | VI       | -0.3~32V   | V    |
| Power Dissipation          | Pd       | 570        | mW   |
| Operating Temperature      | Topr     | 0 to +70   | °C   |

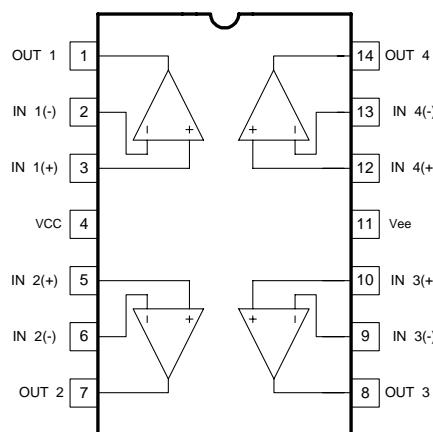

|                     |      |            |    |
|---------------------|------|------------|----|
| Storage Temperature | Tstg | -65 to 150 | °C |
|---------------------|------|------------|----|

**ELECTRICAL CHARACTERISTICS (Ta=25°C)**

(Vcc=5.0V, All voltage referenced to GND unless otherwise specified)
